The goal is to enter into homes that differ from each other in style and culture and to give meaning and value through charm and elegance, based on a unique customized project for each customer. Each project has its own needs and the choice of the elements that will lead to its realization needs to be coordinated through an organized structure.

We are not influenced by industrial concepts but by artisan production and method: not being bound by the use of certain materials or technology and being able to produce in cycles that depend on our hands proves that we have no limit except our own mind.

Even if Capital products are sons of an artisan production process, they are formed and designed in an international context inspired by different cultures and countries, known through travelling and experiences. For us Made in Italy means designing and producing in a way recognized and appreciated by people all over the world, it’s the result of passion, the production excellence of Italian culture and the sophisticated style which is visible in every detail.
